

# The Cure for Cancer? Part 2

Jim LeBeau Certified Natural Healthcare Practitioner

<https://www.phpower.org>

Over 100 years ago “experts” started doing things that dazzle the mind. They invented and built cars; airplanes; TV sets, computers; skyscrapers; rockets etc. It has been impressive, but these things are all **dead as a doornail** with the “experts” only smart about **dead** things just like those who made false gods to dazzle Hebrews before Jesus. Before and since Jesus, the human brain has not made a living thing. With all the dazzle America said goodbye God, goodbye healthy America. What does God know? Maybe He knows how life works? *“For He is not a God of the dead, **but of the living: for all live unto Him**”*.

Due to a false assignment of authority a deep confusion has carried over into American food, medicine, and thought. What does God know about how to fertilize soil, grow food without chemicals, feed a baby, heal a body? America has faith in “experts” who can’t make a blade of grass or housefly. The result? Today over 40% of America’s kids have a “chronic disease” according to the Center for Disease Control. About 18% of America’s gross domestic product (GDP) goes for SICK-CARE while some countries spend half as much and are healthier. A faith in “experts” good at dead things has messed up systems we depend on for wholeness of body and mind. Don’t expect drug companies and doctors to fix this. The more sick people there are *the more money they make!*

As most churches sleep “cancer rates continue to climb” Dr. Mercola. After 50 years of a “war on cancer” with \$500 billion spent “the cancer death rate has hardly budged” - other sources. Of course. Who is teaching Americans how to test and balance body chemistry - pH, sugars, digestion etc.? Ignorance and disease flourish, the price we are pay for saying goodbye to God in agriculture, infant care, food, medicine. But good news is blowing in the wind. The “God of the living” will save us if enough of us learn His ways and make them our ways! It might save some from a miserable death from cancer. It’s up to us.

Here’s a major clue in how to make the healing of America work. *“There has never been a cancer cell in the history of the world that has had normal respiration”* - two time Nobel prize winner Otto Warburg and Dean Burke of the National Cancer Institute. If a doctor can resuscitate a body, shouldn’t God be able to resuscitate a cell? It’s not just about cancer. Knowing how to keep 40 trillion cells breathing right, or resuscitating as needed, is also the way to beat almost every affliction of body or mind, or just to feel better.

Who is responsible for helping trillions of cells breathe right and resuscitating the ones gasping for air? Me, you, God. Here's the tricky part. Since we are unique in genes and chemistry, the ways to help our trillions of cells breathe right are also unique. There are as many ways to support normal respiration in cells as there are people on earth using the three-part formula of Part 1 (see "cancer" page at [phpower.org](http://phpower.org)). This may seem to make things hopelessly complicated until you realize normal respiration in a body *or a cell* depends primarily on the balance of only three key body systems; pH, sugars, digestion.

Good news! The *self-testing* and *self-balancing* process to balance these three key systems as taught in a Nutrition-for-life kit automatically compensates for unique chemistries and genes as the never-changing constants of chemistry, biology, and physics work, just as God created them to work, to remove toxins and heal at the cell level. Read again.

Should you do this alone or with your doctor's help? That depends on you, God, and the doctor of your choice. Jesus set a "heal thyself" example. I follow that, and Him, Whatever your choice, keep in mind that body chemistry is primary whether to heal a broken bone or a cell out of breath. A surgeon can cut out a tumor, but only a body with chemistry in balance can heal itself. Also, good chemistry only works by natural things or what God and Jesus have made (John 1:3). Mother's milk and love are the foundation, then come real food and goodness of mother earth. Since we all depend on the same sources for air, water, food, herbs etc. personal healing depends on a group effort to keep things clean and wholesome. Tell your church, political leaders. *Some things need cleaning, healing.*

While using natural powers, we must correct habits that choke cells. If you are a smoker or heavy drinker, stop. If a junk ultra-processed food addict or over-eater, stop. If hooked on products with toxic chemicals, stop. If sugar addicted, think whole foods, balance systems. If you don't understand how lifestyles mistakes mess up bodies and minds, stop ignorance.

Imagine if America turns from "goodbye" God to **HELLO!** Imagine if we learn His ways of helping cells breathe easier! Imagine if we demand food rich in minerals, no poisons, no GMO! Imagine if kids start getting better grades, no autism, no hyper. Imagine if leaders listen more to the people instead of to lobbyists. Imagine if more churches start teaching this. Imagine if everyone takes responsibility for their health with billions saved on "sick-care" quickly paying off the national debt! Dream, dream, Jean - gee whiz, am I dreaming my life away? Will you help to get this message out? Dreams can come true you know.
