

The Cure for Cancer?

Jim LeBeau Certified Natural Healthcare Practitioner

<https://www.cancer3.org>

Two time Nobel prize winner Otto Warburg 1962:

“There has never been a cancer cell in the history of the world that has had normal respiration” according to Otto Warburg and Dean Burke of the National Cancer Institute. Warburg wrote “The prime cause of cancer is the replacement of the respiration of oxygen in normal body cells by a fermentation of sugar”.

Below is a simple three-part “cure for cancer” formula to be customized with professional help for anyone wanting to maintain or restore *normal cell respiration*. Today the “Warburg effect” is generally accepted while big pharma focuses on genes which takes “cure” out of your hands and into their hands. With RFK Jr. heading HHS that may change.

Meanwhile the Warburg effect shows us a simple way to prevent and cure cancer with natural methods that you may use at home working with your oncologist *and* naturopathic doctor. This may take serious effort. Nowhere in scripture does God say “blessed are the lazy and ignorant”. For details see a Nutrition-for-life kit.

Oxygen UP (pH balance); 2 - Sugars down; 3 - Lifestyle fix

Lifestyle fix: balance digestion; move more while improving nutrition; correct addiction issues; pray hard; forgive, cry, and vent as needed; add Jesus, love.

Oxygen/pH - Mayo clinic: “Heart cancer is extremely rare”. If oxygen to cells helps prevent or cure cancer then rare cases of heart cancer make perfect sense since hearts get the first serving of oxygen from pulmonary veins before pumping it out to parts further down the line that are *susceptible to cancer* like **breast, prostate, colon**. Lung cancer makes sense if you factor in smoking, air pollution indoors and out, acidity, *and shallow breathing from sitting too much*.

The **pH connection** - oxygen needs a near perfect balance of hydrogen ions (acidity) to control rate of bio chemical reactions in body fluids: blood, saliva, digestive juices etc. Thus Arthur Guyton M.D. calls pH “one of the most important aspects of homeostasis” (Medical Physiology). *Balance your pH!*

Sugar connection: high blood sugar inhibits oxygen while feeding cancer cells - double whammy! Stay on low side of normal. *Balance your sugars!*

Digestion: Gut microbes make the B vitamins needed for completion of the normal respiration cycle in cells and much more. *Balance your digestion!*

Move more! More oxygen can only reach far out body parts by a strong heartbeat because micro-capillaries are too small for oxygen rich blood cells to slip straight through. They must crimp and slip through sideways. Blood cell clumping (rouleau effect) adds to the problem. *Move more, breathe deep!*

Love - mother-infant bonding: lack of a beautiful mother-infant bond leads to more cancer later. If “God is love”, and He is, this also makes perfect sense. See Part IV of the Nutrition-for-life manual for more on “The Cause and Prevention of Cancer”, and “nine years without losing a patient”.

Breast cancer: expect more if not breast feeding to bring oxygen rich blood to breast tissue and take out the garbage to relieve congestion that leads to cell stress and dangerous mutations. Your baby doctor explained all this, right?

Natural immunity sums it up: Oxygen up; sugars down; healthy gut; move more; toxin removal; cry, forgive, bless, love more - golden keys to beating cancer. Tell one and all. Every truth is a candle that lights the way to God.

Otto Warburg on ways to support normal cell respiration: “*They may be realized by everybody, anywhere, at any hour. Unlike the prevention of many other diseases, the prevention of cancer requires no government help and no extra money*”. However, a Nutrition-for-life kit might make a difference.
