Miracle Cures Part 2

"He sent them forth to preach the gospel and *heal the sick"* Luke 9:2.
Healing Gospel #10 – Jim LeBeau Certified Natural Healthcare Practitioner

"What will you do after the chair gets you up" I asked a man with no arms and no legs. The year was 1985. Doctors had removed all of his limbs in the end stage of diabetes. Suddenly he seemed to recognize his predicament. His face took on a sick despair I will never forget. I fear for the souls of those who *knowingly* ignore or perpetrate this kind of pain on another.

Each year about 75,000 arms and legs are cut off in American hospitals due to complications of a disease routinely cured by doctors who use natural remedies to control sugar. Drug companies make about $22.3 billion every year on insulin sales (American Diabetes Association). Diabetes is only one of several hormone deficiency diseases that respond to nutrition. The standard treatment is Hormone Replacement Therapy or HRT or hormone replacement therapy. With so much money to be made treating a deficiency, why use nutrition that can strengthen and heal a weak gland - off with those arms and legs! Never mind the ultimate pain and suffering unless you believe Jesus of course. Those who follow Jesus know the price to be paid by those who don't show mercy*. "God is not mocked".*

The man with no arms and no legs needed someone to show mercy before his limbs started to die from lack of oxygen. He was let down by a medical system. He was also let down by any church that looks the other way when human arrogance and money corrupt God's ways of fertilizing soil, growing food, feeding a baby, and healing the sick.

CAUTION: *First educate thyself before going on a self-healing path. Seek qualified professional help whenever symptoms are so indicated.*

A LIFETIME SENTENCE – since modern medicine doesn't understand the power of nutrition to heal a failing gland, hormone replacement therapy or HRT is a lifetime sentence for most. If you're a drug company, great. The money keeps flowing in. This travesty will continue until more of us wake up to the deceptions of our time.

One of the major deceptions of our time is that only an artificial chemical (patent medicine or drug) has power to treat, mitigate, cure, or prevent disease. That leaves God and any food or herb He made out. Other deceptions include the need of artificial fertilizers and pesticides to make food; foods are improved by processing; baby formula is equal to mother's milk, and you can ignore God's ways and still enjoy a high place in heaven. Every deception leaves its own broad swath of pain and suffering.

Meanwhile miracle cures that show mercy abound. Mercy comes by truth, power of prayer and Spirit, and the natural energies or powers of creation. Even if it comes by a glass of water those who experience healing can say "miracle of God" since "all things were made by Him" John 1:3. While we occupy bodies "all things" God made to support bodies have a part to play in the total wellness of body, mind, and spirit.

David wrote "O Lord My God, I cried out to you for help and you healed me" Psalm 30.2. He felt healing power from heaven as did the woman who touched the hem of His garment. I felt that power in 1978 ("revelations" page at phpower.org). In my case it was thyroid, adrenal glands, and my soul that needed healing after many years of suffering. Praise God for that. Here are details on how God's ways of healing work for me and others.

Miracle cure #4 – hypo-thyroid

(continuing from Part 1)

The doctor looked at me sternly and warned "If you don't take thyroxin every day from now on you will soon be a helpless heap on the floor".

While my thyroid was hypo-functioning I also had symptoms of hypo-adrenals or Addison's disease. Symptoms included blackouts, low blood pressure, irregular heartbeat, panic attacks etc. Failing adrenals or a failing thyroid are examples of a hormone deficiency as when the B cells of the Islets of Langerhans don't make enough insulin. Should a doctor treat these conditions with hormone replacement or will good nutrition help a struggling gland work better? You know the answer.

I never saw that doctor again. I did not take any thyroxin. In my research of natural remedies, I learned some amazing things. For thyroid deficiency I learned the real problem might be lack of TSH (thyroid stimulating hormone) from the pituitary. The thyroid could be fine. I also learned that TSH needs manganese and other elements commonly missing in factory farmed foods that support the pituitary – nutrition to the rescue!

Another life-saving tip came from Weston Price D.D.S. who studied 14 places where people grow old without getting sick. All 14 included some form of seafood in their diets, plant or animal. Seafoods are a source of iodine and other elements missing in farmed-out soils.

Another life-saving tip came from Adelle Davis who taught the importance of TOTAL NUTRITION. Every piece of the puzzle counts. One missing element or vitamin can mess up the whole thing. A missing element could be "essential" or maybe a little known "rare earth" element that doubles the lifespan of lab animals (Wallach). Maybe it's one of five thousand Soil Based Organisms (SBOs) found in freshly picked garden vegetables?

Trying to fix a deficiency of some kind that we might not yet even know about or the name of might seem to be an incredibly complicated and difficult task. Maybe not. Maybe the simple answer is to trust God's ways of fertilizing soil, growing food, feeding babies, healing by balancing key body systems that run the show? The elements are there.

It turned out the cure for my hypothyroidism was in the same simple things I was doing to support healthy adrenals and kay body systems like pH and digestion. It came down to only one big thing, trusting God's ways. In the process of learning how God's power works by creation and by Spirit I learned about the "tail that wags the dog" (see Part 1). Fix key body systems along with your soul and everything falls into place. Trusting God's ways are the ultimate cure for all things related to body and mind *just as the words of Jesus are the ultimate cure for lost souls.*

Miracle cure #5 – hypo-adrenia

While thyroid hormones regulate speed of metabolism, adrenal hormones are involved in minute-by-minute heartbeats and breathing patterns. Healthy adrenals are a matter of life and death. In time, with study patience and prayer, I was successful in rebuilding two adrenal glands. Lucky for me I came across a book by Henry Bieler M.D. "Food is Your Best Medicine". Lucky for me there was a chapter with a focus on *rebuilding worn-out adrenal glands.* The key was FRESH FOOD without pesticides.

I also learned that adrenal "survival" glands hold more vitamin C complex than any other part of the body! That's C with all fractions and co-factors as found in every fresh fruit and vegetable. You can also get C from the adrenal glands of a cow if eaten raw, but most prefer the other option.

While learning to heal with food I didn't completely give up on regular food, soups, stews etc. I just changed the emphasis. In time with help from heaven my adrenals worked perfectly, as did my thyroid and pituitary.

America needs a healing gospel of Jesus. Pass it on.
