

# The *One and Only* Cure for Cancer

Jim LeBeau Certified Natural Healthcare practitioner <https://www.phpower.org>

In this article I will prove there is *only one* possible cure for cancer, also the remedy for almost every sick thing of body and mind. The basics of chemistry, physics, biology, and life as God created it will not change. The prevention and cure of cancer is for everyone to learn how to maintain normal cell respiration by balancing pH, blood sugar, and digestion while avoiding toxicities and doing all things with love. *“There has never been a cancer cell in the history of the world that has had normal respiration”* said Otto Warburg in his Lindau lecture 1966, winner of two Nobel prizes, agreed to by Dean Burk of the National Cancer Institute. A balanced pH is key to oxygen; low blood sugar weakens/starves cancer cells; and a gut with good microbes makes the B vitamins needed for normal respiration in cells as all things healing and holy work by love. For current thinking on the “Warburg effect” search *how do cells produce energy* also *how do **cancer** cells produce energy?*

May 3, 2025 - how do cells produce energy? *“Your cells are energized by factory-like machines inside them called **mitochondria** which turn your food and **air** into ATP. Having an abundance of ATP allows the cells to perform their function, self-repair, regenerate”.*

May 3, 2025 - how do **cancer** cells produce energy? *“Cancer cells predominantly produce energy by a high rate of glycolysis followed by lactic acid **fermentation** in the cytosol rather than by a comparatively low rate of glycolysis followed by oxidation of pyruvate in mitochondria as in most normal cells. This is known as the **Warburg effect**”.*

How might a cell gasping for oxygen and struggling to get energy from a “fermentation of sugar” feel? Imagine you’re drowning, fighting for air, turning blue. You’re trying to *mutate* to get oxygen from water like a fish. That’s how

Oxygen is the key to avoiding the “Warburg effect”. Whatever you do to help OXYGEN RICH BLOOD reach all body parts helps your cells breathe easy and make the proteins that activate the P53 anti-tumor gene while supporting natural immunity with T and killer cells that gobble up cancer cells and junk. Anything interfering with normal respiration - toxins, smoke, junk food, system imbalances, sedentary lifestyle etc. chokes cells and forces mutations. Normal respiration depends on biological and spiritual (epigenetic) powers. With \$500 billion spent on a “war on cancer” you might wonder why you weren’t taught how to keep your 40 trillion cells breathing right since the basics of mitochondrial function with oxygen and glucose have been known for 50+ years with hydrogen ions (pH

or acidity) of body fluids playing a key role in the control of oxygen, enzymes, and body electricity. The answer - you can't make money teaching God's ways. Also, when you dig into specifics, *it's complicated*. Read Warburg's Lindau lecture of June 1966. It's easy to get lost in the woods, especially since diseases come in so many varieties, each with its own potential pill "fix". The way out of complexity and confusion is to *focus on healthy*. Health works only one way, God's way, using the natural powers of elements like oxygen and hydrogen plus water, food, herbs, sunshine etc., and the supernatural powers of truth, love, prayer, and Jesus Who made all things (John 1:3). Everyone can understand this.

Litmus paper for testing urine and saliva pH has been around since the early 1930s. In 1992 I wrote a book on pH focusing on whole body function. On page 43 I wrote "if pH is off YOU CAN'T BREATHE RIGHT". What works for a whole body works for a cell. Here are a few key points.

- Hydrogen is the most abundant element in the universe and the smallest - no hydrogen; no water (H<sub>2</sub>O); no life. The letters "pH" mean "potential" hydrogen.
- Concentration of negatively charged hydrogen ions (pH) controls enzymes, oxygen, and electricity. A lead acid battery moves power fast, an alkaline battery little power moving slow. With pH off, enzymes "engines of life" are "inactive" or weak. Weak or inactive enzymes can't digest food right for elements needed to breathe right, nor give cells power to function right and eliminate toxins. Urine and saliva pH testing gives an advance signal of trouble even while blood is normal. Tell your doctor.
- All biology works under the frequencies of earth's energy/electromagnetic field. Life forms use different pH of body fluids. Acid carnivores breathe faster, burn out quicker; herbivores slower; humans a mix depending on diet. If we tend organic herbivores like Adventists in Loma Linda California and other "blue zones" we may age *without getting sick* and our children, and us too, are smarter and better behaved.

Bottom line - the cure for cancer and many more ills is a balanced pH for oxygen; blood sugar on the low side; digestion in balance; avoid cancer "triggers", add love. Since what some of us do gives cancer to others we each must do our parts. Examples are the toxicity of chemical farming; ultra-junk food and drinks; moms, dads, doctors who let babies miss out on maternal-infant bonding (Part IV of kit manual); and churches that ignore cruelty. This article is only a hint at a vast body of truth documented by science and supported by scripture (see "cancer" page at [phpower.org](http://phpower.org)). "He sent them forth two by two to preach the gospel and *heal the sick*" Luke 9:2. Truth heals, but only if it can reach minds. Pass it on.
