

Miracle Cures

“He sent them forth to preach the gospel and *heal the sick*” Luke 9:2.

Healing Gospel #9 by Jim LeBeau Certified Natural Healthcare Practitioner

IMPORTANT: “Miracle cures” reported here *respect* laws of nature, not defy them. When they work however, you may thank God as profusely as if Jesus Himself laid hands on you and healed you. In a way that would be true since “all things” used in natural healing were made by Him (John 1:3). The power to heal begins at ground level when healthy plants fight off bugs without pesticides and we respect whole food as God makes it. Add, faith, prayer, common sense, and *seek professional help when symptoms are so indicated*.

Miracle #1 true story - “Pain wouldn’t go away”. In my mid-seventies in spite of doing everything right (I thought) the pain in stomach wouldn’t go away. I went to a doctor. After the exam He said “Something is definitely wrong. You should get a complete GI (gastro-intestinal) scan - cost \$500, your insurance will cover it”. Knowing radiation from x-rays is cumulative I said “before that I’m going to stop eating for a day or two”. He looked at me like I was bonkers. I left the clinic. I stopped eating – no food, no pills, no supplements, water only. After a day and some praying the pain was completely gone. It has not returned. That was 12 years ago.

Detail: Arthur Kaslow M.D. in “Freedom from Chronic Disease” reported “seven out of ten patients feel some relief from their symptoms” after a “48 hour distilled water fast”. He also found short term fasting made patients *more sensitive to what food and pills do to their bodies.*

Miracle Power # 1 – self-control, prayer, fasting, listening

“This kind only goes out with prayer and fasting” Matthew 17:21.

Miracle # 2 true story – sore throat: Growing up on a farm with raw milk but also with sweet junk foods my early life seemed like a constant sore throat. Doctors said “take tonsils out”, but folks never did. Today I am happy they didn’t. I use them every day. Today at 88, trusting my tonsils and the power of natural healing, and trusting the power of body systems balancing, I don’t have sore throats to worry about.

True story - In 1986 my salesman Dave in his late fifties was on the road in far northern Wisconsin on a bitter cold winter night selling three wheeled power scooters. I called from my office in Thiensville at 8pm. I could barely hear him gasp “sore throat”. I told him what worked for me. Squeeze juice of half lemon on tongue directly into throat bypassing teeth, gargle, let sit a minute, swallow. Dave *of little faith* scoffed, didn’t think it would work. With no options he found a store, bought a lemon, did the lemon trick. Next morning I called Dave. *Miracle! Sore throat gone!* He was so happy.

Detail: citric acid plus C probably weakens whatever microbe is causing pain and swelling in tonsils, then the weakened microbes swallowed and assimilated become a self-vaccination as immune cells in blood notice a threat and make antibodies. Voila – natural immunity, no “shot”. For more on the lemon see “Power of The Lemon” in a Nutrition-for-life kit. Also search National Library of Medicine (pubmed.gov) with “lemon and cancer” or “lemon seed, peel, juice, cancer” etc. You should find about 15,000 studies from credible sources. You may do the same “and cancer” search for an apple or any fruit or veggie. The APPLE for example, peel, seeds, and all, has chemicals that kill cancer cells at each of the four stages a normal cell goes through on the way to malignancy.

Miracle Power #2 – learning how whole foods heal, power of faith.

“He provides for the birds of the air and lilies of the field.

How much more for you, O you of little faith”. Matthew 6-7

Miracle Cure #3 – old age issues, tired, memory, mental health, cancer, just about anything. About 30 years ago I saw pictures taken by a doctor who took “before” and “after” microscopic pictures of the live blood of patients. The “before” pictures were taken before patients swallowed supplements of *enzymes and antioxidants*. The “after” pictures were taken two hours later. The “before” pictures looked like “sludge” with red blood cells clumped and other strange stuff. The “after” pictures showed blood bright red, clean, no clumping (no “Rouleau” effect). The shocking thing was how fast the changes showed up. This taught me the power of natural healing to make a *miracle* for cancer, covid, senility, whatever.

Detail: The key word is *oxygen*. How important is oxygen? Close mouth, hold nose. That’s a clue. That tells you how a cell feels slowly choking to death before mutating to cancer or something else. The details may be complex but the truth simple. *A healthy cell knows how to breathe right. A healthy breathing process is supported by enzymes, antioxidants, and other wonders in raw fruits, veggies, seeds, nuts, milk, dairy, and perhaps an occasional raw egg from a range free hen well beaten with a fork and salt and pepper added like we kids used to enjoy on the farm!* Test to make sure the end result is a balanced pH, balanced sugars, and balanced digestion.

Perhaps you’ve heard of a “miracle” healing after someone goes on a fresh raw food plan, or maybe you experienced the blessings of “an apple a day”, or a green salad or some version of a fresh raw fruit, veggie, and whole grain program? The *enzyme plus antioxidant* combination plus the fiber, friendly microbes, and hexagonal shaped water clusters all help to explain many a healing miracle. Thank God for food that keeps us whole in body and mind. Thank Jesus for truth that makes us whole in soul.

Miracle Power #3 – trusting Father and Son for how they made life work.

“Trust the Lord with all your heart” Proverbs 3:5-6

K.I.S.S. or confusion?

Keep It Simple Stupid. I was told to do this long before I studied human physiology and nutrition. Sometime In the 1980s I realized our human brains, smart as we think we are, are not close to being qualified to understand, much less manage, all the details and complexities of body chemistry. Thank God for the autonomic nervous system. Our best option is to trust God in how He made life to work while focusing on the big picture and what details we are able to understand and control. Sometime back then I came up with the *tail wagging the dog*.

A powerful tail (and tale) - The “dog” is the estimated 40 trillion cells that make up our bodies and parts. The tail represents systems that run the show including pH related to oxygen, enzymes, electricity; digestion related to everything; sugar related to heat and energy; body temperature related to metabolism; and blood pressure related to hydration and fluid balances. That’s five systems to manage. Most of us can count to five. Now imagine a 400-pound gorilla grabbing this dog (40 trillion cells) by the tail (key systems) and wagging it. That’s the gorilla power we have when we learn to balance five key systems that “wag: our bodies toward wellness or sickness. Testing gives us biofeedback to tell us *what works and what doesn’t*.

Possibly the most powerful words in the Bible are “trust the Lord with all your heart”. K.I.S.S. Trust the Lord for how He created systems to *fertilize the soil, make food, feed babies, heal!* While we can’t control everything, we do have some control over our thoughts, habits, lifestyles. That’s all we need to escape the cruel systems that first make us sick, then take our money treating symptoms as underlying causes are ignored.

America desperately needs a *healing gospel of Jesus*.
