

A gospel of kindness to all with a focus on little ones.

## *A Gospel of Kindness to little ones*

The living Christ revealed Himself to me *in glory* in the summer of 1978 along with a gospel kind to babies, children, the earth, and all on it. The memory is as fresh as this morning's dew on the grass. I am an old farm boy from the Upper Peninsula of Michigan. I have no reason to make up stories. My purpose in writing this is so you might come to know the Jesus Who loves babies and children - *also a Jesus of wonder, peace, and healing power.*

Jim LeBeau

**July 1978** – I was holding my preemie baby girl of 1½ years as she cried and tossed fitfully in my arms. Her mother was at a church meeting. Life had recently been rough with a major business setback. For some reason my heart opened to this precious angel in a way I had never experienced. It is impossible to describe the depth of compassion and love I felt for my baby girl other than with words like soul moving and transforming.

The next morning I experienced the revelation of the Jesus *in glory* who loves little ones. He appeared in an early morning “vision” unlike any kind of dream. I was in that semi-conscious state going from deep sleep to full wakefulness.

**THE VISION** was of the Christ child leaping from the right into the center of a half circle of children in the 10-12 year range to the left. They were still at the age of innocence. Their purity and joy at seeing Jesus was an important part of the vision.

**THE POWER** that accompanied the vision was an energy rush that I can best describe as an ocean wave moving toward shore, then easing back. It was a power surge followed by the settling back into the sea and a relapse into the deepest peace you can imagine. Try to remember the sound of waves when at the beach. Remember the ebb and flow and the deep peace the ocean sounds brought to your soul. Multiply that by 100 times. That only begins to explain the A – A – A - H – H – H – H resonating in the souls of the children and my own soul. It brought a “peace that passes understanding” as distant from any normal life experience as is the morning star from earth.

I awoke with my arms stretched high above my head like a healthy baby after nursing and for some in worship – my soul resonating peace and power. “And we saw *His glory*, the glory as of the only begotten of the Father, full of grace and truth” John 1:14. I believe this

revelation was given to help us understand how much Jesus loves little ones, and why we should love them too if we want Him to love us too.

### **The Jesus Who loves babies and children**

- **May have been revealed to Isaiah** “And a little Child shall lead them” Isaiah 11:6  
Every living thing starts life in infancy in a sacred relationship with a parent.
- **Is no weakling.** There is nothing weak about the power that I experienced and of which it is written “By Him all things were made, and without Him not anything was made” John 1:3. **“God - of the living: for all live unto him”** Luke 20:38.
- **Is the “Author of life”** (Acts 3:15) expecting us to respect the sanctity of the mother-infant relationship and all sacred relationships that He created.
- **Calls us to wholeness** - a voice that whispers across the eternal stillness of time and space and says to a listening soul - BE WHOLE. That agrees with “And of His *fullness* we have all received, and grace for grace” John 1:16 and much more in scripture.

### **America’s little ones in big trouble**

- Per EWG/Red Cross study 10,000+ American babies born each month must deal with hundreds of toxic manmade chemicals in bloodstreams, many carcinogenic;
- Per CDC vaccine schedule (CDC.gov) for a sexually transmitted disease (hepB) on day born most American babies are injected with the following brain damaging mixture - aluminum hydroxide. yeast protein. sodium chloride. disodium phosphate dihydrate. sodium dihydrogen phosphate dihydrate. Is this to help babies or to make somebody money?
- Who is educating teenagers and young couples on the sanctity of the mother-infant relationship and dangers of genetically modified (GMO) chemically grown mineral deficient foods with connections to autism, developmental disorders, and over 50% of American children with “adult” diseases? America’s little ones are in big trouble.

The above is an introduction to troubles American babies face the day born and in some ways all of us face.

A gospel of kindness can only work if enough people read it and pass it on. **“Be merciful”**. Pass this on with one click by email or by word of mouth. Start a conversation that might put big smiles on millions of small faces and maybe some big ones too! Plant the seed – inch by inch, row by row. Some will fall on rock and shallow soil, but some will fall on good ground and grow returning a harvest of 30, 50, 100 times that planted.
