

# God's many ways to prevent and Cure Cancer

And how to make them work for you, for everybody, for everything!  
From The Perfect Health Foundation a Christian non-profit  
By Jim LeBeau, Certified Natural Healthcare Practitioner

*“There has never been a cancer cell in the history  
of the world that has had normal respiration”*

Otto Warburg, winner of two Nobel prizes in chemistry  
and Dean Burke of National Cancer Institute in 1962

Imagine if we could learn how to help trillion of cells breathe normally and *resuscitate* (breathe new life) into cells struggling to catch their breath! Many acknowledge the “Warburg effect” but nobody tells us what to do about it.

Warburg also said: *“The prime cause of cancer is replacement of the respiration of oxygen in normal cells by a fermentation of sugar”.*

Cancer hates oxygen, loves sugar, most agree with that. That makes two clues to help 40 trillion cells breathe better. How complicated can that be? On ways to prevent cancer Warburg said:

*“They may be utilized by everybody, everywhere, at any hour.  
Prevention of cancer requires no government help, no extra money”.*

Ah - maybe there's hope for us common folk. After \$500 billion spent on a “war on cancer” Dr. Mercola says “cancer death rates continue to climb” and others “cancer death rate has hardly budged”. What's going on? (next page)

## What's going on? *They left God out!*

That says it all. Soon you will know how we can win the war on cancer while everyone gets closer to God. For centuries those we call “experts” have dazzled the world by inventing and building things like airplanes, cars, TV sets, rockets to the moon, computers, skyscrapers etc. Wow! Impressive indeed, but have you noticed these “things” are all **dead as a doornail** like the false gods that dazzled the Hebrews before Jesus? Since Jesus or before, the human brain has never made one living thing. Yet with all the dazzle many have said *goodbye to God* for expertise in how life and living things work. What could go wrong? What can God know? Maybe He knows a few things about life *“for He is not a God of the dead, but of the **living**: for all live unto Him”*.

## Truth, trust, and consequences

Can “experts” in dead things be trusted as “experts” at life? Think about what’s happened in American agriculture, food, and medicine because of a trust of “experts” in dead things. They led the way in how we grow food, fertilize soil, feed babies, heal the sick. Today over 40% of America’s kids suffer from a “chronic disease” according to the Center for Disease Control (CDC). About 18% of America’s gross domestic product (GDP) goes for SICK-care while other countries spend half as much and are healthier. It seems “experts” at **dead** things aren’t very good at living things. In fact, they have messed up just about everything for everybody and they’re still hard at it. Don’t ask drug companies and doctors to fix this problem.

*The more sick people there are, the more money they make!*

What does God know about growing healthy food for us to eat? Pass the NPK fertilizer. Soon crops are mineral deficient and too weak to fight off bad bugs, Now we have to pass the pesticides and herbicides as topsoil shrinks from 20 to 7 inches and those who eat the crops become as mineral deficient as the soil and food they eat while poisoning themselves *and getting more cancer*.

Trust the “experts” they said. What God know about how to feed a baby? Pass the “formula”, deny babies God’s nutrition, and deny both mothers and babies a lifetime of blessings from a beautiful maternal-infant bond.

What does God know about healing? Pass the drugs. You can’t patent a natural biomolecule but you can make big bucks with artificial chemicals. If some dare to treat disease with things God made call it “quackery” and them “quacks”.

But GOOD NEWS! God has billions of ways to cure cancer, treat disease, and help you feel better based on the simple idea of helping 40 trillion cells breathe easier and resuscitating weak ones before they mutate. It begins with putting the “Warburg effect” to work by helping God a little, and by realizing that *only things made by God - food, water, herbs, fresh air, sunshine etc., can be trusted to help our trillions of cells keep breathing normally!* (read again please)

## Who is responsible?

It takes three to make life work - you, me, and God. We need God for truth that works by His Spirit, His word, *and His food* to keep us whole as it does for the “birds of the air” (Jesus). We need each other because we share sources of natural things like air, water, food, herbs etc., and responsibility to keep them clean and wholesome. Since we are unique in genes and chemistries, what we need for healing is also unique. There are as many ways to keep cells breathing right and everyone feeling wonderful as there are people on earth. That would seem to complicate things until you learn that normal respiration in a cell, or in a whole body, depends primarily on the balance of *only three key body systems:*

## **pH, sugars, and digestion!**

There’s more good news! The *self-testing* and *self-balancing* process taught in a Nutrition-for-life kit automatically adjusts for unique chemistries and genes while constants of chemistry, biology, and physics work as God made them to work to remove toxins, build immunity, heal a body cell by cell (read again).

## We are all involved, and we are all needed

The “cure for cancer” begins at birth down to earth. Give life a good start, fix food and agriculture, watch what happens! A “**heal thyself**” lifestyle keeps good things going. Ignorance and lethargy are the enemies. It must be a group effort because we depend on each other and common sources for the quality of air, water, food, herbs, truth. Everybody needs to pitch in - *no exceptions!*

## Some things need *cleaning up*

Our responsibility is to take charge of personal and earth health, pitch in to clean things up as needed, and most importantly educate and heal ourselves,

## It works for everything!

Maybe cancer is the least of your worries? Maybe you just want to feel better or enjoy stronger natural immunity? Great! Help your cells breathe easier and worry less about everything else potentially harmful to body, brain, mind.

## **HELLO God - HELLO Healthy America!**

Imagine if America turns from “goodbye” to **HELLO God!** Imagine if we all learn His ways of helping our cells breathe easier! Imagine if we demand food from rich topsoil, no poisons, no GMO! Imagine if our kids get better grades, no autism, no hyper. Imagine if leaders listen to the people instead of lobbyists. Imagine if churches start teaching this. Imagine if everyone takes responsibility for their health and the billions saved on “sick-care” go to quickly pay off the national debt! Dream, dream, Jean - gee whiz, am I dreaming my life away? Will you help to “**heal thyself**” and America? Dreams can come true if you do.
