Comments of past seminar attendees and health professionals

Registered nurse B.C. Mequon, Wisconsin - "As a registered nurse of over 25 years I found the information regarding the bodily function, i.e. cells, pH, organs, to be exceptional. I am impressed".

M.D. Thiensville, Wisconsin "Due to my various health problems the topics covered were very informative. The seminar and the film made you aware how beautiful our body is, how it operates and heals itself given the proper care".

Registered nurse Hinsdale New York: "I have seen pH balanced chemically and seen people feel better. Then shortly after discharge they start getting sick again."

Chiropractor "In my chiropractic training I studied some biochemistry, however, this seems to take the mystery out of biochemistry. It's really a lot of fun to balance myself and have over my life. Thanks" Dr. C.H. Martinez California,
